Australia Awards in Indonesia Split-Site Masters Program (SSMP) An Introduction

Featured: Shani Agung Nugroho, Australia Awards Split-Site Masters alumnus

Introduction and Background

Australia Awards are prestigious, transformational scholarships and short courses offered to emerging leaders from developing countries to study, research, and pursue professional development in Australia and the region, so they can return home and contribute to their nations' development, prosperity, and resilience.

The scholarships have been an important component of the Australian Government's overseas aid program since the Colombo Plan in the 1950s.

Australia Awards in Indonesia (AAI) aims to support Indonesia in achieving its development goals through education and knowledge transfer. It also aims to build an enduring relationship between Indonesia and Australia that advances mutual interests. More specifically, the Split-Site Masters Program (SSMP) seeks to:

- Provide relevant and flexible study programs to the Indonesian Government Organisations (IGOs).
- Improve efficiency and effectiveness in a scholarship scheme.
- Enhance engagement between the Australian and Indonesian Government Organisations.

Rationale

SSMP is responsive to the development objectives of the participating IGOs. The IGOs can choose the universities delivering tailored study programs following their human resources development plan. In addition, substantial efficiency in funding is achieved as each party covers a portion of the expenses, allowing organisations to reinvest the budget into a larger pool of scholarship recipients.

Program Details

SSMP involves at least 12 months of study at an Indonesian university, followed by 12 months of study at an Australian university, leading to the awarding of two masters degrees in one related field of study. The successful graduates will hold two masters degrees from two reputable universities.

In delivering SSMP, the Australian Government bears the cost for the Australian study component, whereas the IGO funds the Indonesia study component.

Another key advantage of SSMP is that partnering Indonesian and Australian universities, selected to deliver the program, can exchange knowledge through joint research supervision and curriculum development. This can further enhance collaboration between the two universities.

Stakeholders

- Funding Donors: Australian Government and Indonesian Government Organisations.
- Implementers: Australian universities and Indonesian universities.
- Managing Contractor: Australia Awards in Indonesia under Tetra Tech International Development.
- Monitoring Bodies: Australian Department of Foreign Affairs and Trade, and the Ministry of State Secretariat, Republic of Indonesia.

Funding

The Australian Government funds the in-Australia component of the SSMP through AAI. Before the study in Australia, AAI will also bear the costs of a Joint-Selection Team (JST) to select the scholars for the scholarship, pre-departure training for the scholars, and mobilisation to Australia.

The IGOs will use their budget to fund the masters program in Indonesia, the required promotions, supplementary English training, and internal selection processes. If approved, participants fail to continue their studies in Australia (due to academic or personal circumstances), the IGO will continue funding those participants to complete their degree in Indonesia.

Eligibility Criteria

To take part in the SSMP, the IGOs should meet the following criteria:

- Be an organisation under one of the ministries or regional governments.
- Have sufficient funding to support the in-Indonesia study component.

- Identify human resources development needs aligned with the national and/or regional development plan.
- Have sufficient managerial capacity to deliver a scholarship program and well-articulated plans to reintegrate returning scholars to the organisations and/or region.
- To be considered favourably, EOIs must demonstrate a strong commitment to collaborative partnerships and enriching the scholar experience.
- Be successful in their Expression of Interest submission for SSMP.

For candidates of the scholarship, the following criteria must be met:

- Be nominated by the participating IGOs.
- Meet the general requirements of Australia Awards (e.g., selected by the Joint Selection Team, obtain an Australian student visa, and support from the Government of Indonesia)
- Have a minimum GPA of 2.9 in their undergraduate studies. Meet the minimum English competence score, i.e., IELTS 6.0, Paper-based TOEFL 552, iBT 80, or PTE 56.
- Satisfy the entry requirements of the participating Indonesian university.
- Fulfil the conditions for transfer to the participating Australian university at the end of the first year of study in Indonesia (e.g., GPA, IELTS, and research topic).

Indonesian universities delivering the program must fulfil the following requirements:

- Have a Memorandum of Understanding and Double Degree Agreement with an Australian university.
- Provide English as the medium of teaching and learning for the selected masters program.
- Have a curriculum that has been negotiated and approved by the partnering Australian university
- Ensure the masters program is registered at Kemendikisaintek.

Selection Process

A short list of candidates is first selected by the IGOs, using criteria such as GPA, English competency score, and state apparatus policy. This list is then submitted to AAI.

AAI will arrange a selection process following the Australian Government standards: an interview with the JST and an IELTS test. The Team consists of Australian and Indonesian academics and professionals.

Monitoring and Evaluation

SSMP is closely monitored both in Indonesia and Australia. AAI will monitor the academic progress from Indonesian universities each semester. Scholars' academic progress in Australia is monitored through an online system called OASIS (Online Australia Awards Scholarships Information System). At the completion of each cohort cycle, AAI will conduct an evaluation of SSMP.
